Link to the past upgrades

FlagView HistoryThis page covers every Sword you can get in The Legend of Zelda: A Link to the Past and how to get it. Found: Link's Uncle hands it over in the Hyrule Castle basementRequirements: None - simply enter into the Hyrule Castle basement in the beginning of the gameUse: The Fighter's Sword's use is obvious - for the beginning part of the game, the Sword is your primary weapon. It's your strongest and most conventional weapon that you can use to damage almost all of the enemies in the game. This weapon is always equipped, so use it well, my friends! Of course, upgrades to your Sword are coming, so worry not!Found: Deep in the Lost WoodsRequirements: Get all three Light World PendantsUse: The Master sword is a step up from Link's conventional Sword that his uncle gives him early on in the game. Found on a secret alter deep into the Lost Woods, the Master Sword will allow you to break the seal atop Hyrule Castle and battle Agahnim to rescue the princess from his evil clutches. However, well... it doesn't end there. => The Master Sword will be a long-used weapon for a majority of the Dark World after fighting Agahnim in Hyrule Castle, so get used to using it. It's twice as powerful as Link's regular sword, and highly, highly useful in all circumstances. Use it as you would use your regular sword; it's that simple.Found: Find the Blacksmith's transformed partner south of the Village of Outcasts in the Dark World. In the shape of a frog, he'll ask to be brought back to his partner in the Light World. Travel to the Light World with him and go to the Blacksmith's House due east of Kakariko Village. Once this is done, leave the house, go back in and give them your Master Sword. Leave the house and screen again, then go back, and pick up your Tempered Sword!Requirements: Titan's MittUse: The Tempered Sword is four times more powerful than the original sword in the game, and twice as powerful as the Master Sword. Colored a powerful shade of orange, the Tempered Sword cuts through enemies like they are a loaf of bread. This is a super powerful weapon, and should be acquired as soon as you get the Titan's Mitt from the Thieves' Town! Otherwise, you're making your life harder than it really has to be.Found: You must trade in your Tempered Sword in the secret fairy fountain within the Dark World's Pyramid of Power. There's a crack along the left side of the Pyramid. After you beat the Ice Palace and the Misery Mire, the Bomb Shop (Link's house in the Dark World) will sell the mysterious Super Bomb. Drag it to the crack on the Pyramid of Power to blow it open. Then, enter into the secret cave and offer the fat fairy your Tempered Sword to get the ultra-powerful Golden Sword back.Requirements: Super Bomb (defeated Ice Palace and Misery Mire)Use: The Golden Sword, out of the four swords in the game, is the most powerful sword in the game. Twice as powerful as the Tempered Sword, four times more powerful than the Master Sword, and an amazing eight times more powerful than the regular Sword you start the game out with, the Golden Sword does optimum damage to all enemies in the game, including the pesky Ganon. Listed below are all of the weapon and equipment upgrades that Link can acquire in A Link to the Past. Arrows Arrow Capacity When Link first gets the Bow and Arrow he can hold a maximum of 30 Arrows. This can be upgraded all the way to 70 Arrows. Go to the Pond of Happiness which is located in the cave in the middle of Lake Hylia at the southeast portion of the Overworld. You will need Flippers in order to reach the island. Go inside and you will find a large. It will ask if you would like to throw in Rupees. Throw in the biggest amount that it allows. It will say that you will have good luck or bad luck. Wait about 20 seconds and go to the pond again and throw in some more Rupees. Once the total reaches 100 Rupees, a Fairy will come up and ask if you would like to upgrade Arrows or Bombs. It will upgrade your capacity, but you can keep upgrading until you reach a total of 70 Arrows. Silver Arrows After Link has acquired the Fifth and Sixth Crystal, he can buy a Super Bomb at the Bomb Shop, which is located in the Dark World, right where Link's house was. Buy one and it will follow you around. Walk with the Super Bomb around the overworld to the Pyramid of Power found right in the center of the map. There is a crack in the wall on the left portion of the Pyramid and the bomb can be used to blow open a whole. Inside, you'll find a Fairy, and if you throw in the Bow and Arrow, the fairy will return it to you and will give you the Silver Arrows. These are much powerful and will kill almost every basic enemy with a single shot. They are required in order to defeat Ganon using traditional means. Bombs When Link first acquires some Bombs, he can hold a maximum of 10 Bombs. This can be upgraded all the way to 50 Bombs. Go to the Pond of Happiness which is located in the cave in the middle of Lake Hylia at the southeast portion of the Overworld. You will need Flippers in order to reach the island. Go inside and you will find a large. It will ask if you would like to throw in Rupees. Throw in the biggest amount that it allows. It will say that you will have good luck or bad luck. Wait about 20 seconds and go to the pond again and throw in some more Rupees. Once the total reaches 100 Rupees, a Fairy will come up and ask if you would like to upgrade Arrows or Bombs. It will upgrade your capacity, but you can keep upgrading until you reach a total of 50 Bombs. Magic Meter In the small area at the east side of Kakariko Village, where there is a single building, there is a cave with a hole next to it. Go up the stairs and use your Magic Hammer to pound the peg and then jump down into the hole. Walk up a screen and you'll find a green structure with a little bowl. Sprinkle some Magic Powder on it and a Bat will come out and cast a spell at you. This will make it so magical items will only consume half of the magic that they originally used. The bat makes it seem like he's hurting you, but he's actually helping you. Boomerangs Boomerang While you walk through the Castle Dungeon for the first time, you'll come across a treasure chest with the Boomerang. It can fetch items on the ground for you, as well as stun enemies. Magical Boomerang You can upgrade to the Magical Boomerang at the Waterfall of Wishing, located near the northeast portion of the Overworld. After acquiring the Flippers, simply walk into the waterfall, located just before the entrance to Zora's Waterfall. Inside you will find a pond where you can toss an item inside. Drop the Boomerang and the Fairy will appear and give you the upgraded Boomerang. This one is red and sparkly, but the big change is that it keeps flying until it hits the edge of the screen. This helps a lot in later dungeons where you can use this to hit a switch in the distance and retried items that are further away. Swords Fighter's Sword Link's Uncle will give you this sword at the very beginning of the quest when Link ventures to Hyrule Castle. While it functions as Link's primary weapon for the early part of the quest, it is one of the weakest weapons that he has in his arsenal. Master Sword After acquiring all three Pendants of Virtue, Link can go to the northwestern corner of the Lost Woods where he can pull the Master Sword from its pedestal. This sword is twice as powerful as the Fighter's Sword and it will shoot beam blades when Link has full health. This item is required to break the barrier that leads to the Hyrule Castle Tower, where Agahnim awaits. Tempered Sword In the Dark World, go to the area just south of the Village of Outcasts, located where the Library was in the Light World. Use the Titan's Mitt to lift the rock and you'll find the Cursed Dwarven Swordsman here. Talk with him and he will start to follow right behind you. Return to the Light World and head to the building that is one screen east of the main portion of Kakariko Village. Inside you can reunite the Dwarven Swordsmiths. Leave the house and go back in, and ask them to temper your sword, and they will do so for 10 Rupees. They will take it from you and will tell you to return shortly. Just leave the building, walk away for one screen, and then return to get the Tempered Sword. This red sword wields double the attack power as the Master Sword. Golden Sword After Link has acquired the Fifth and Sixth Crystal, he can buy a Super Bomb at the Bomb Shop, which is located in the Dark World, right where Link's house was. Buy one and it will follow you around. Walk with the Super Bomb around the overworld to the Pyramid of Power found right in the center of the map. There is a crack in the wall on the left portion of the Pyramid and the bomb can be used to blow open a whole. Inside, you'll find a Fairy, and if you throw in the Tempered Sword, the fairy will return it to you and will give you the upgraded Golden Sword. This is the strongest sword in the game dealing twice the damage of the Tempered Sword and four times the damage as the Master Sword. Shields Fighter's Shield Link's Uncle will give you this shield at the very beginning of the quest when Link ventures to Hyrule Castle. It is the weakest shield in the game and is not able to block many attacks at all. Fire Shield Link can get the Fire Shield two different ways. It is sold in a shop in the Dark World for 500 Rupees, but the free way to get it is by getting it right after you get the Zora Flippers. Once you get the Zora Flippers and leave Zora's Waterfall. There is a small waterfall located at the top-left of the area just outside of Zora's Waterfall. Swim into the waterfall and it will take you to a fountain. It will ask you to throw something in. Throw in your Fighter's Shield and in return the fairy will give you the Fire Shield. This upgrade allows Link to block weak fire attacks. Mirror Shield The Mirror Shield is the dungeon item found in Turtle Rock. It is much stronger than any other shield in the game, and it can block strong beam attacks. While it is the dungeon item of Turtle Rock, it is a completely optional item. Mails Green Mail The Green Mail is the one that Link has at the very start of the game. It is Link's classic green tunic and it will be the tunic worn through the majority of Link's quest. Blue Mail The Blue Mail is the dungeon item found in the fifth crystal of the game, the Ice Palace. This will reduce the damage that Link takes from attacks by 1/2. This tunic is completely optional during Link's quest. Red Mail The Red Mail is the final dungeon item that Link will acquire, found deep within Ganon's Tower. Link will take 1/2 the amount of damage he took with the Blue Mail, or 1/4 the amount of damage he took while wearing the Green Mail. This tunic is completely optional during Link's quest. Gloves Power Glove The Power Glove is the dungeon item of the Desert Palace. It gives Link the ability to lift up the white rocks, allowing Link to traverse new areas of the Overworld, as well as uncover new secrets. Titan's Mitt Found as the dungeon item in Thieves' Town, the Titan's Mitt lets you lift up the black, heavy rocks found throughout the game. This item is required to navigate portions of the world, including being able to reach each of the final three crystals in the Dark World.
